VirtualXPro

Your Smart Partner for **AI-Powered Evaluations**

Flexible | Customizable | Scalable | Modular | Affordable | Reliable

VirtualX Pro

VirtualX Pro is an AI-powered web-based online examination platform designed to deliver efficient and scalable assessment solutions for companies, schools, colleges and universities. The platform offers an intuitive yet powerful environment for managing exams, mock tests and homework assignments with ease.

With continuous innovation and the integration of advanced AI capabilities. VirtualX Pro is evolving to meet the growing and changing demands of modern digital assessments.

Services

We offer four key service models to support the diverse needs of our clients.

Integration with Learning Management Systems

VirtualX Pro provides seamless integration with external Learning Management Systems (LMS) through a robust REST API framework. This enables institutions to access, update and manage assessment data directly from their own platforms or applications.

Hosted VirtualX Pro Solution

We offer a fully managed and hosted version of VirtualX Pro operated from our secure European data center. This service allows organizations to deploy and run the platform without the need to manage their own infrastructure, ensuring reliability, security and smooth operation.

Customizing VirtualX

Recognizing that every organization has unique operational and academic requirements. We also provide custom development and solution tailoring. Alongside regular platform updates our team can adapt VirtualX Pro to meet specific workflows, integrations or feature requirements.

AI-Enabled Services

VirtualX Pro leverages artificial intelligence to simplify and accelerate the exam creation and evaluation process. Features such as AI-powered question generation from source content, AI-assisted exam creation, AI-powered Face ID image capture and AI-evaluation (Descriptive questions) significantly reduce manual effort for educators.

Key Features

- Secure Role-Based Access Control for controlled and authorized platform access.
- Flexible Question Creation with multiple question creation modes.
- 10+ Question Formats, including objective and descriptive question types.
- AI-Powered Question Generator for faster and smarter question creation.
- Template-Based Exam Creation to streamline assessment setup.
- Centralized Question Bank for efficient question organization and management.
- Advanced Question Import & Export for easy content migration and reuse.
- AI-Powered Evaluation for automated evaluation of descriptive answers.
- Manual & Automated Evaluation to support different assessment requirements.
- Single Sign-On (SSO) integration with Google and Azure for seamless access.
- Safe Exam Browser to provide a secure examination environment.
- Exam Monitoring & Advanced Proctoring to help maintain exam integrity.
- AI-Powered Face ID Verification with face image capture for candidate authentication.
- IP-Based Access Control to restrict exam participation based on approved IP addresses.
- Real-Time Reporting & Result Management for timely insights and efficient result handling.
- Retry & Resume Options for mock tests, providing greater flexibility to learners.
- Multilingual Support for assessments across different languages.

VirtualX Pro is an AI-powered platform for exams, practice and learning trusted by schools, universities and enterprises.

Why VirtualX ?
